

# POLITICA PER LA QUALITA', L'AMBIENTE E LA SICUREZZA

Founded in 1969, OMR Italia S.p.A. is today one of the major European manufacturers of professional printed circuit boards for medium and large batches. Located in Concorezzo (Milan) on a total area of 28,000 square meters, it produces up to 500 m<sup>2</sup> per day. Exporting throughout Europe, it operates in a leading position at European level in the production of professional printed circuit boards.

The plant has a high level of automation with a beneficial reduction in the impact of labor and a substantial increase in competitiveness. Through a continuous investment in human and technological resources, OMR Italia S.p.A. is able to guarantee the highest quality and reliability of its products and services.

Thanks to our experience and our certifications IATF 16949:2016, UNI EN ISO 14001:2004 and UNI EN ISO 9001:2015 we serve various sectors, such as Automotive, Green Energy, Assemblers, Home Automation and Industrial Electronics.

OMR therefore stands as an extremely reliable and flexible global supply partner, allowing its customers to reduce the total cost of ownership and speed up the time to market.

The Mission of OMR Italia S.p.A. is to develop its position as a leading company in Europe for the production of professional printed circuit boards, increasing the quality and reliability of products and services by investing in human resources, technologies and industrial processes, in order to continuous improvement.

The strategy consists in promoting OMR Italia S.p.A. on the European market to look for new opportunities for long-term collaboration and to be a client's partner working with a primary objective: your satisfaction.

OMR Italia S.p.A. can count on:

- 50 years of history and industrial tradition;
- High technical knowledge of product / process and product / service quality;
- Broad production capacity;
- High operational flexibility;
- Proximity to its customers throughout the European area and ability to dialogue in different languages;
- Solution for the security of supplier risk management supplies;
- Personnel with long professional experience in the sector and low turnover;
- Ability to integrate and collaborate with the customer at different operational levels;

OMR Italia S.p.A. is strongly committed to minimizing the environmental impact of its activities and products, in order to pursue the continuous improvement of its environmental management system and to increase its environmental performance. To this end, it undertakes to guarantee the continuous improvement of the environmental services related to the activities carried out. In addition to ISO 14001 certification and compliance with the REACH and RoHS regulations, OMR Italia S.p.A. has:

- an establishment according to the applicable laws;
- a waste management plan through recovery;
- a plan to reduce the environmental and economic impact on water and electricity.

From year 2019 OMR has strategically defined to start an outsourcing of finished PCBs produced in far east and dedicated only to non-automotive market .

This new activity is completely managed with the final customers.

OMR Italia S.p.A. undertakes to comply with current legislation and regulations applicable to company activities, to assess security risks with appropriate management plans, to periodically review management systems, policies, environmental and quality objectives, and compliance with the objectives agreed with the CUSTOMER, in order to verify its adequacy and efficiency. Starting from this policy of quality, environment and safety, the Management has defined the objectives and the strategic indicators, as well as developed the training and awareness of all the collaborators to the different issues, promoting a sense of responsibility towards quality, the environment , safety and towards the satisfaction of the CUSTOMER.
