Printed Circuit Boards and customized solutions for the following sectors:

- automotive
- e-mobility
- industrial automation
- medical
- renewable energy systems
- assemblers (EMS)
- robotics
- telecommunications

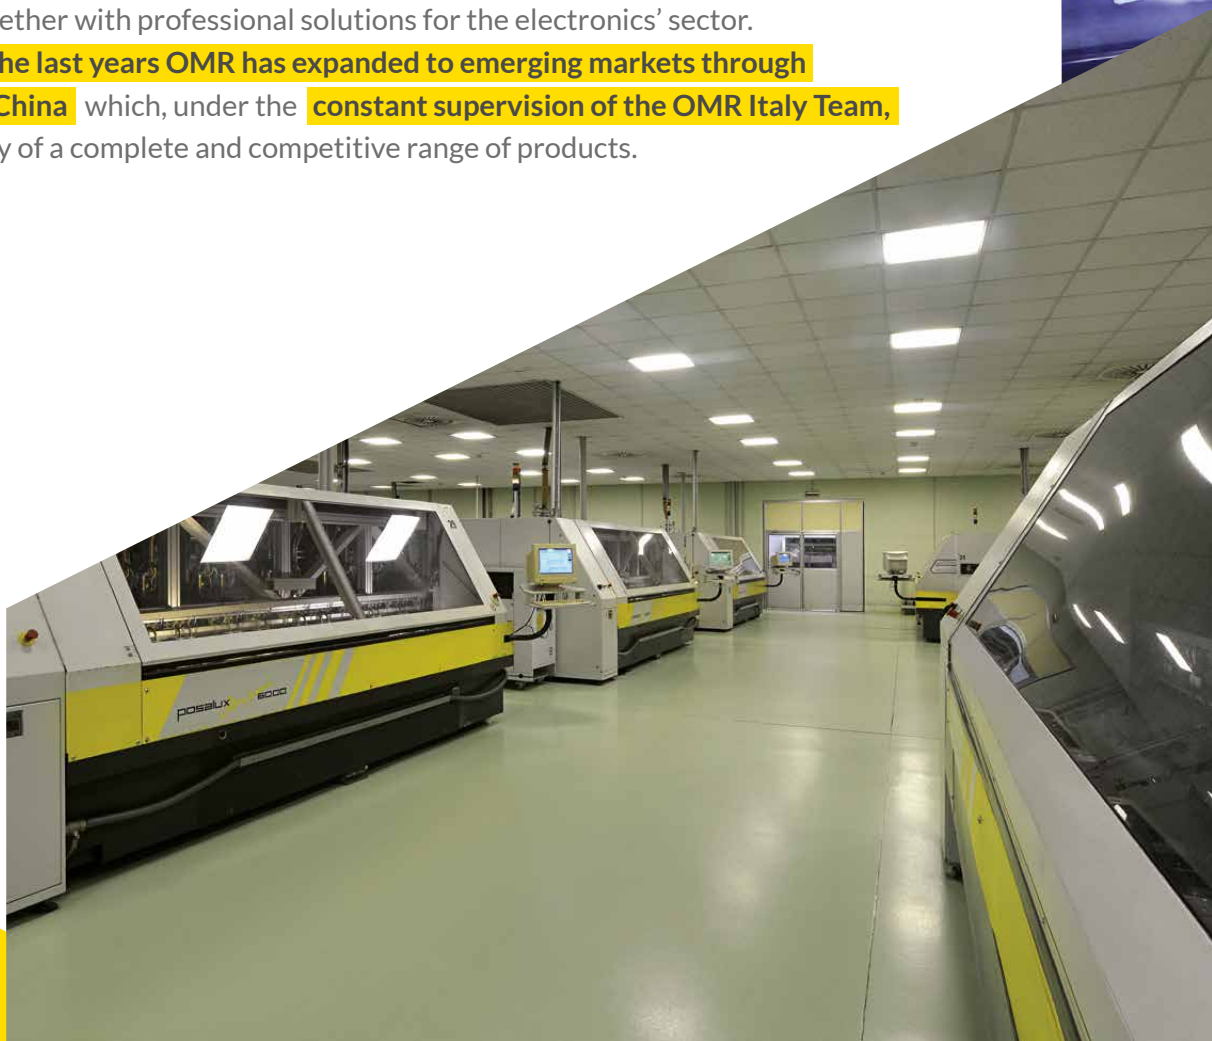

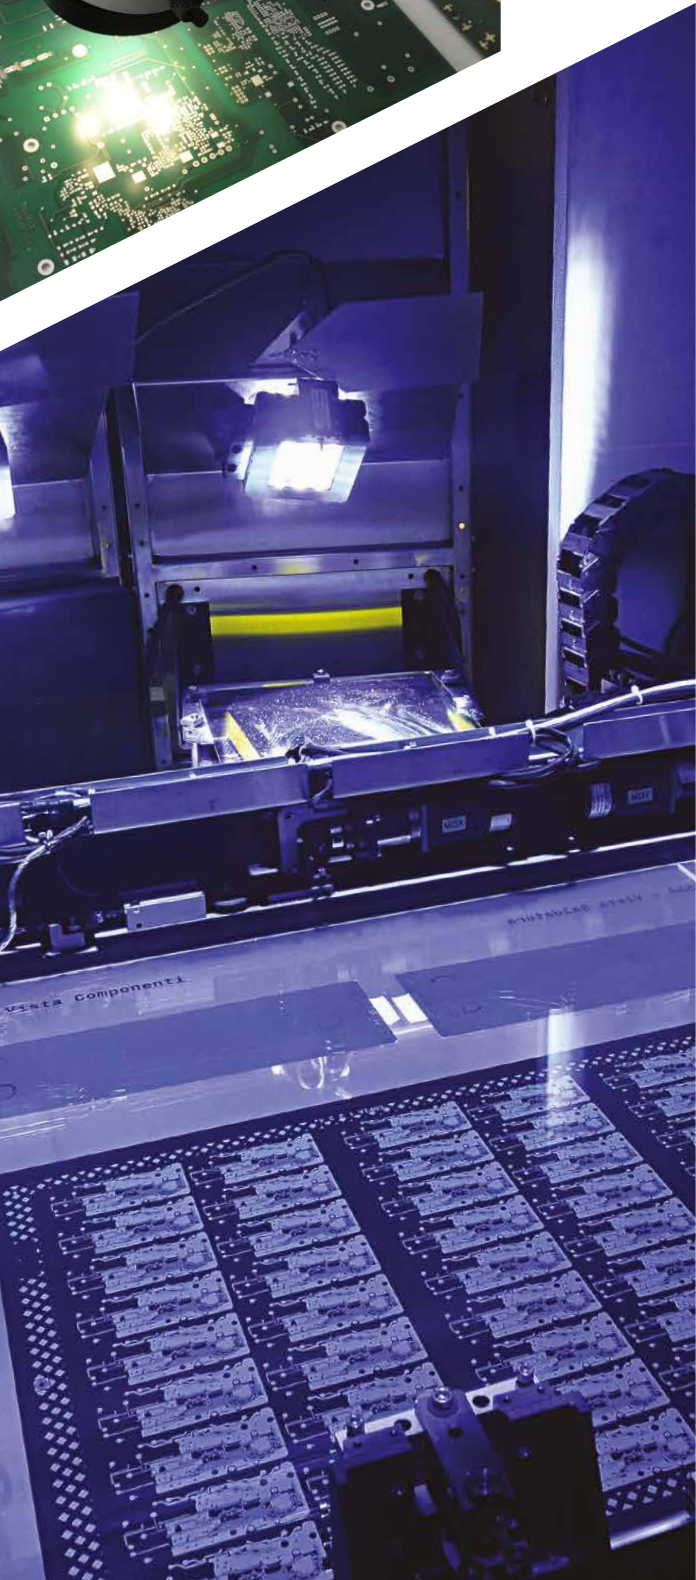

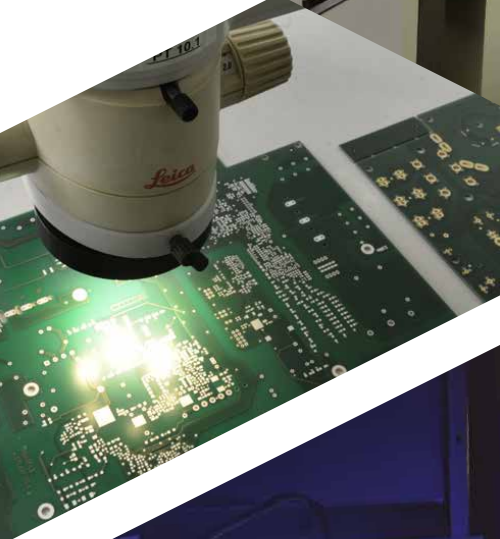

Made in Italy quality and competitiveness for the global market

At the service of our clients' projects for half a century.

Since 1974, thanks to the internal production plant and laboratory of the headquarters just outside Milan, **OMR has guaranteed** the development and production of printed circuit boards together with professional solutions for the electronics' sector.

Moreover, over the last years OMR has expanded to emerging markets through a partnership in China which, under the **constant supervision of the OMR Italy Team**, enables the supply of a complete and competitive range of products.

7 Very good reasons to choose OMR

Don't just settle for a conventional printed circuit board supplier, choose the advantages of an international technology partner.

- ✓ 24 HRS high production capacity
- ✓ Strict quality controls
- ✓ Solutions for supply security
- ✓ Dedicated advice from feasibility study at final delivery
- ✓ Optimized process management
- ✓ Deliveries throughout the world
- ✓ Production certified by the highest international quality and environmental impact reduction standards
